	issues; A plan to go home and use for training trainers; discovered the importance of death; Expects God's Power; Strong on critical path and evaluation	the training. The participants make their own plan; Strong on Prayer; Many good parts to create oral method; Good stuff on who we are in Christ; Strong on platforms, research & planning.	home, but expects variation; Very detailed the part of the CP Plan; simple guides; Much more detail on how to do church practically.	the parts of the CP Plan; A plan to go home with to train pastors and other SCs; Multiple trainings. Requiring to have a mentor to participate means more participants successful. Strong on Critical Path and evaluation.
Disadvantages	No specific plan for on-going training; may have overkill on CPM and Case Studies; Prayer as a lifestyle in not covered; Not as much freedom to come up with own plan – T4T or some modification expected. Hard to use in other cultures without much modification. Hard to use in truly oral places. The SC Training part is expensive.	Weak on Character and no specific plan for on-going training; Lots of extra stuff on research, platforms, and overkill on master plan; Not a full training to hand them to take home – therefore some have great new programs but many fail. So many options people may have problems staying on critical path. Does not use many Case Studies. Noting on Mentoring and Coaching, little for on-going accountability. [Gets you started with a plan but after that lacking.]	Weak on Prayer and Character; no specific plan for on-going training.	Philippine T4T is long; Most of the material was written with Tribal or Catholic Background people in mind. Nothing on Security and Platforms; 3 1-week sessions means that some miss weeks and costs more than shorter SC Trainings. SC Training limited to 15 participants per time means sometimes there is a bottle neck.
